

“Anti-Static Jacketing”

Wrap-Around, Anti-Static Jacketing Now Available from Zippertubing®

Los Angeles, CA, Zippertubing® is proud to announce the addition of “AST”, a wrap around anti-static cable jacket to its product line. A Carbon loaded, fire retardant, PVC coated Polyester fabric that combines a tough abrasion jacket with anti-static conductivity. A property grounded “AST” jacket will eliminate static charge buildup and thus prevent potential explosive conditions or damage to static sensitive electronic devices. “AST” is ideal for protecting electrical cabling in clean room environments from static charge buildup common with plastic insulation materials. “AST” is ideal for fabricating anti-static airflow ducting for use in tunnels, mines, or electronics ventilation systems.

“AST” is available in the classic Zippertubing® side entry design and can be closed with a variety of closure methods. This jacketing product is capable of withstanding temperatures from -20° C to 100° C and is available in sizes from 3/8” and up diameters, for both flat and round cable bundles.

For more information contact your local Zippertubing® Representative for product information or contact The Zippertubing® Company at 13000 S. Broadway, Los Angeles, CA 90061. Phone (800) 321-8178, Fax (310) 767-1714 or visit their web site at <http://www.zippertubing.com>.
