

“Z-Foil New Wrap-Around Low Cost EMI Shielding for Flat and Round Cable”

Los Angeles, CA, Zippertubing® is proud to announce the addition of “**Z-Foil**”, a low cost, lightweight, low profile, high performance wrap-around polyester backed Aluminum foil shielding product. This high performance shielding combines the proven technologies of Al foil and a high performance pressure sensitive adhesive closure method. This product is extremely economical, very flexible, and lightweight with excellent shielding characteristics for high frequency shielding applications. “**Z-Foil**” is available in sizes for flat or round cables with diameters ranging from 1/4” to 4”. It is capable of withstanding continuous operating temperatures from -40° C to 150° C.

“**Z-Foil**” is ideal for automotive, aerospace, computer systems, electronic office equipment, communication systems as well as medical electronics where low cost, flexible shielding is required.
